

## Steps

1. Add the trigger to the jenkinsfiles

```
triggers {  
  pollSCM('H/3 * * * *')  
}
```

2. Push the code

***git add .***

***git commit -m "message"***

***git push***

3. Run Jenkins job manually , this time only

4. Now to test it , add some changes in the code like

```
6   stages {  
7     stage('Test stage') {  
8       steps {  
9         sh 'ls -l'  
10        sh 'pwd'  
11        sh 'terraform -version'  
12        sh 'aws sts get-caller-identity'  
13        sh 'which ping'  
14      }  
15    }  
16  }
```

5. Push the code

***git add .***

***git commit -m "message"***

***git push***

6. Check on the Jenkins

**Jenkins** / vish-job2 / Git Polling Log

- Status
